1983 Article Index

Systems Management Principles

Integrating major motivational theories (Feb)
Brian H. Kleiner

The V-curve: A road map for avoiding people-problems in systems changes (Feb)
Dr. Frank Collins

Dress management: Applied nonverbal communication for career development (Mar)
Dr. Brian H. Kleiner

Japanese management style right for DP? (Mar)
Dr. Mark Lincoln Chadwin and Dr. Edward M. Cross

Billing frequency optimization (May)
Dr. John D. Stowe and Dr. Charles R. Litecky

What MIS executives need to know about robotics (May)
Dr. James C. Wetherbe and Scott Conrad

Ordering techniques (May)
J. G. Gillis

System for increasing inventiveness (July)
Dr. David S. Brown

Corporate politics and the system's process (Sept)
Stephen A. Dimino

Creativity, problem-solving and decision-making (Sept)
Jim G. Gillis

How to steer the computer services ship (Sept)
George Khtaian

On beyond "Z": Japanese management style might seuss us just fine (Oct)
Dr. Paul S. Licker

Quality circles in the systems environment (Nov)
Lee Pickler

Dimensions of productivity improvement (Dec)
K.L. Brookfield

Managing the Systems Effort

Iteration, key to useful documentation (Jan)
Al Mingione

Planning a career path in information systems (Jan)
Pamela H. Cheesbrough and Gordon B. Davis

Controls in automated information systems (Jan)
Robert Gevirtzman

Integrating major motivational theories (Feb)
Brian H. Kleiner

The V-curve: A road map for avoiding people-problems in systems changes (Feb)
Dr. Frank Collins

Small companies—big differences (Feb)
Gary A. Studer

Output design and management (Feb)
Karen L. Hooks and Jerry D. Siebel

The prime ingredient: Analysis (Mar)
Jack Caldwell

Disaster prevention (Mar)
Ralph L. Kliem

Japanese management style right for DP? (Mar)
Dr. Mark Lincoln Chadwin and Dr. Edward M. Cross

Information system analysis and design (Apr)
Dr. Sitansu S. Mittra

Practical considerations in decision support system design (June)
Belden Menkus

Problem definition: Tasks and techniques (June)
Gil Mosard

Quantification: An essential part of system design (June)
Sitansu S. Mittra

Managing user expectations (June)
Dr. William Doll and Dr. Mesbah U. Ahmed

Implementing the open-planned office (July)
Harold L. Airson, III

Feeding problems in DSS (July)
Dov Teeni

Using the internal auditor for system design projects (July)
Dr. Earl M. Wysong, Jr.

Justifying office automation (July)
William J. Boczany

Information systems—A field in transition (Aug)
Tim Bryce

Keyboard workstation inventory model (Aug)
James E. Anderson

Information systems professional's job transitions: Its influence on information systems design (Aug)
Konrad E. Sadek, Ronald W. Hull and Alexander E. Tomeski

Corporate politics and the system's process (Sept)
Stephen A. Dimino

How to steer the computer services ship (Sept)
George Khtaian

After implementation what's next? Evaluation (Sept)
Dr. Gary I. Green and Dr. Robert T. Keim

Measuring intangible benefits of computer-based information systems (Sept)
Dr. Robert D. Smith

Prototyping information systems (Sept)
William C. Andrews

Systems procedures and controls (Sept)
Dr. Dan C. Kneer

Information resource planning (Oct)
Robert V. Head

Getting too much system—an avoidable tragedy (Oct)
Dr. Stephen R. Ruth

Communications planning (Oct)
Landon C. Miller

Productivity and DP management: Losing control? (Oct)
Richard L. Plasket and Paula Wilneff

Natural language for database access (Nov)
William Leigh

Para-professionals in system development (Nov)
James N. Harris and Thomas R. Hoffman

The problem with "errors" (Nov)
Belden Menkus

The system is a social, not a technical device (Dec)
Leslie H. Matthes

Project selection top priority for MIS executives (Dec)
Dr. T.C. Willoughby

Project management in a small organization (Dec)
Francois Lustman

Selection and Training of Systems Personnel

Planning a career path in information systems (Jan)
Pamela H. Chesebrough and Gordon B. Davis

Dress management: Applied nonverbal communication for career development (Mar)
Dr. Brian H. Kleiner

Communicating performance results (Mar)
Patrick M. Gallegos

Organizations, ethics and the computing professional (Nov)
Dorothy Heide and James K. Hightower

Techniques for an effective subordinate/supervisor relationship (Dec)
Dr. Brian H. Kleiner and Lorraine Peterson

Techniques for an effective subordinate/supervisor relationship (Dec)
Dr. Brian H. Kleiner and Lorraine Peterson

Information Collection, Storage, Retrieval

Iteration, key to useful documentation (Jan)
Al Mingione

The documentation hassle (Feb)
Stephen F. Jacobus

Disorder to discipline via the data dictionary (May)
William Durell

Filing the output: the missing link (Dec)
Stephen A. Dimino

DP Hardware and Software Applications

Auditing the on-line, real-time computer system (Jan)
Charles L. Holley and Fredrick Millar

Using computers to manage your cash (Jan)
Jeremy Grand

Installing manufacturing system software (Feb)
Ronald G. Donoghue

A personal computer? Who needs one? (Feb)
Jack Caldwell

The main-frame computer: A glimpse into the future (Feb)
Richard A. Kaimann and Terry L. Johnson

Structured techniques for software development (Mar)
Dr. M. K. Rajarman

Database management systems: An operational perspective (Apr)
Myles E. Walsh

Simulation language selection (Apr)
Dr. Philip Y. Huang and Parviz Ghandforoush

Step-by-step approach to designing on-line systems (Apr)
Barry Nirmal

Developing microcomputer based business systems (Apr)
Dr. Chris Edwards

Human engineering in screen design (May)
Wilbert Galitz

Disorder to discipline via the data dictionary (May)
William Durell

Data processing: A management paradox (May)
Robert H. Forney, Richard G. Race and Richard P. Nashleanas

Controls prevent computer negligence and fraud (May)
Gloria T. Wallach

Placement of DP center in multihospital system (May)
Dr. Ik-Whan Kwon and Thomas K. Vogler

Design strategy for nonprocedural languages (June)
Roger L. Hayen

MIS and DBMS: Where does one end and the other start? (June)
Dr. Israel Spiegler

Computer security practice (June)
Dr. Steve Guynes, Michael G. Laney and Dr. Robert Zant

A strategic approach: The use of tools (June)
Robert H. Forney, Richard G. Race and Richard P. Nashleanas

Manager's view of assembly language programming (July)
Phil Ardery

Reconditioning the software asset (July)
Robert H. Forney, Richard G. Race and Richard P. Nashleanas

Research in software maintenance (July)
Warren Harrison, Dr. Kenneth Magel and Raymond Kluczny

Micrographic solutions for personnel systems (Aug)
Col. Leonard S. Lee

Segment reporting for the DP profit center (Aug)
Dr. Daniel M. Norris

Measuring intangible benefits of computer-based information systems (Sept)
Dr. Robert D. Smith

Decision-aid for small business computer selection (Sept)
Louis Raymond

Incorporation of intangibles in computer selection decisions (Nov)
Dr. V. K. Vaid-Raizada

Microprocessors in the office: A study of resistance to change (Nov)
Dr. Frank Collins and Dr. Tom Moores

System for charging computer services (Nov)
Chien-Hua Michael Lin

Management Science

Logical process modeling (Jan)
Robert C. Herron

Timing of borrowing decisions—A decision support system (Apr)
Dr. Jonathan Frank and Jacques Schnabel

Practical considerations in decision support system design (June)
Belden Menkus

Q-GERT vs. GPSS (Aug)
Philip Y. Huang, Patrick R. Philipoom and Loren R. Rees

The data foundation (Dec)
Kenneth R. Bainey

Management Information Systems

Control of MIS: A comprehensive model (Jan)
Dr. James A. Hallam, Dr. Stephen F. Hallam and Theresa A. Hallam

Controls in automated information systems (Jan)
Robert Gevirtzman

Quality assurance information system for a brewery (Apr)
George Griesinger, James F. Cox and Dr. Charles A. Snyder

Step-by-step approach to designing on-line systems (Apr)
Barry Nirmal

What MIS executives need to know about robotics (May)
Dr. James C. Wetherbe and Scott Conrad

MIS and DBMS: Where does one end and the other start? (June)
Dr. Israel Spiegler

Feeding problems in DSS (July)
Dov Teeni

Information systems—A field in transition (Aug)
Tim Bryce

Are MIS capable of setting goals? (Oct)
Mehdi Khosrowpour

Graphic Presentations & Reports

Financial returns on a P&P manual (Feb)
Stephen M. Goldfarb

Human engineering in screen design (May)
Wilbert Galitz

Organization of policy and procedures statements (July)
Stuart P. Bloom

Case Histories

Applications systems planning at Weyerhauser (Mar)
Pran N. Wahi, Kenneth A. Popp and Susan M. Stier

Quality assurance information system for a brewery (Apr)
George Griesinger, James F. Cox and Dr. Charles A. Snyder

Timing of borrowing decisions—A decision support system (Apr)
Dr. Jonathan Frank and Jacques Schnabel

Placement of DP center in multihospital system (May)
Dr. Ik-Whan Kwon and Thomas K. Vogler

Bar codes control stock transfers (Oct)
Frank Tarsia

Constructing a parish system (Oct)
Dr. Malcolm King
